

Early and periodic screening, diagnostic and treatment services (EPSDT) are preventive and diagnostic services available to most recipients under age 21 (For Nevada Check Up, ages 0 through 18). In Nevada, the EPSDT benefit is known as Healthy Kids. The benefit is designed to identify medical conditions and to provide medically necessary treatment to correct such conditions. Healthy Kids offers the opportunity for optimum health status for children through regular, preventive health services and the early detection and treatment of disease. Services may include eyeglasses, teeth restoration, and hearing aids.

For more complete information, see Chapter 1500 of the Medicaid Services Manual at <http://www.dhcfp.state.nv.us/MSM/CH1500/MSM%20Ch%201500%206-29-07.pdf>
